## PROFESSIONAL EXPERIENCE

**Software/React Developer,** *Foznik Info Solutions*                    03/2023 — 09/2023
                                                                                                              India
- Hands on experience in building React components, implementing state management, and handling data flow within the application.
- Identifying and resolving issues within React.js applications, including troubleshooting and debugging code to ensure smooth functionality.
- Designing and implementing user interfaces using HTML, CSS, and JavaScript alongside React.js and Nodejs
- Working with React Native and Redux.

**Assistant Professor, Computer Applications,** *WMO IG College*        12/2020 — 12/2022
                                                                                                              Wayanad, India
- As an e**ducator**, I had the privilege of teaching a range of subjects that spanned key areas of computer science. Some of the subjects I handled included Data Structures, Information Security, Web Technology, and Java Programming. In these roles, my aim was to impart comprehensive knowledge, practical skills, and a deep understanding of the subject matter to my students.
- **Admission Nodal Officer** - Overseeing and managing the entire admission process for incoming students. I was responsible for ensuring a seamless and transparent admission experience while adhering to college policies and regulations.
- **NAAC Coordinator** - responsible for overseeing and coordinating activities related to the National Assessment and Accreditation Council (NAAC) accreditation process. This role involved collaborating with various departments and stakeholders to ensure the college met the quality standards set by NAAC.
- **Project Guide** - Providing mentorship and guidance to students undertaking academic projects, typically as part of their coursework or as independent research initiatives. Supported students in various aspects of project development, helping them navigate challenges.

- **Coordinator of the National Conference** on NEP (National Education Policy) - Orchestrating and overseeing the planning, organization, and execution of the conference and provided a platform for educators, researchers, and stakeholders to discuss and exchange insights on the implementation of the new education policy.
- In the capacity of **conducting interviews** for the Assistant Professor position in the Bachelor of Computer Applications (BCA) program, my role involved evaluating candidates for their academic qualifications, teaching expertise, and alignment with the college's educational objectives. This process aimed to identify individuals who possess the knowledge, skills, and passion required to effectively educate and inspire future BCA professionals.

**Freelancer -  Wordpress Developer**                          12/2019 — 09/2020
                                                                          India
- A static business website for a business using WordPress. The website aimed to provide essential information to local customers and enhance the store's online presence.
- Utilized the Elementor tool within WordPress to create a feature-rich website for an import-export business. The goal was to showcase products, services, and global reach in a visually compelling way.

## EDUCATION

**M.Tech in Computer Science ( Network and Security ),**          08/2018 — 08/2020
